

FLAMME

APPOLIA "Flame" products can be used in direct **contact with a flame (gas cooker)** but can also be used on an **electric hob**, a **traditional oven** or in a **microwave**. They can be **easily washed by hand** or in a **dishwasher**.

OVENWARE

FOR LIGHT AND HEALTHY COOKING

Our Eco-céram paste is made from raw materials. These are mixed following a specific recipe, which guarantees a low porosity (below 3%) and an excellent resistance to thermal and mechanical shocks. Our products are covered with resistant enamels which gives a strong resistance to scratches and an easy cleaning after use. Thanks to the thermal inertia, your dishes will stay hot for longer even whilst eating.
